A large portion of the fees may be claimed back from the SETA.

WHO IS THE TRAINING AIMED AT?

The Occupational Certificate in Project Management qualification is intended for both Project Management Practitioners and new learners seeking a career in Project Management.

ON ACHIEVING THIS QUALIFICATION, THE LEARNER WILL BE ABLE TO:

- ▶ Initiate a project to address specific project objectives.
- ▶ Plan and prepare the delivery of a project.
- ▶ Execute and control the delivery of a project management plan.
- ▶ Manage the project close-out process.

ENTRY REQUIREMENTS

NQF Level 4 (Grade 12) or equivalent, with English and Mathematical Literacy.

RECOGNITION OF PRIOR LEARNING (RPL)

Recognition of Prior Learning provides an alternative access route into a programme of learning for those who do not meet the formal minimum requirements for admission but have the required knowledge, skills or experience for the qualification.

Learners may access this qualification in terms of recognition of prior learning, subject to quality assurance by (Services SETA).

Workplaces must confirm prior learning by certifying a work experience for learners.

UNEMPLOYED LEARNERS

Unemployed learners with no access to a workplace will be assisted with access to workplace experience either from within Project Management Learning Institute sponsored projects or participating workplace partners. This will subsequently increase learner employability following a qualification based on the job training.

EXTERNAL INTEGRATED SUMMATIVE ASSESSMENT

An external integrated summative assessment, conducted through the Services SETA, is required for the issuing of this qualification.

The external integrated summative assessment will focus on the Exit Level Outcomes and Associated Assessment Criteria and will consist of an open book knowledge assessment.

QUALIFICATION STRUCTURE

This qualification is made up of the following three compulsory components:

- ▶ Knowledge
- ▶ Practical Skills
- ▶ Work Experience

Knowledge refers to theory as opposed to action. This draws on the information learners have obtained throughout their theoretical training. Knowledge questions may test understanding or require learners to explain aspects of the subject matter.

Practical Skills refers to practical tasks or assignments that are the act of engaging in an activity (i.e. action) for the purpose of improving or mastering it. Practical tasks may ask learners to perform, create or develop evidence.

Workplace Experience refers to workplace tasks aimed at providing the learner with an opportunity and confidence to conduct project work under authentic working conditions under supervision. This includes exposure to the complexities of dealing with different workplace demands. In other words, the workplace question requires learners to interact with their workplace or organization to meet certain objectives.
